AM300 Articulating Large Display Mount

The AM300 is a mega sized wall mount that takes on the biggest of displays. Secure large flat-panel screens using the most versatile mounting solution on the market today. The AM300 supports up to 300 lbs in total weight capacity while still allowing for a wide range of motion. It offers 10° of tilt along with 90° of swivel to provide viewers with the ultimate viewing experience.

With unmatched movement versatility, the AM300 can also hold up to 300 lbs, which is more than the weight of most standard displays.

Among articulating mounts the AM300's price to value is amazing, especially when using larger format displays in professional applications.
