NOTES	PAGE 8

Read instructions prior to assembly. This console contains parts that can be damaged if assembled incorrectly or in the wrong sequence.

Verify that you have all the parts required to assemble the console. Due to many configurations possible for the Monitor Frame, there may be extra hardware included. Exact hardware and parts required are listed on the same page as the step where they are needed.

Assistance is required during some parts of the assembly; look for this "Helper" symbol:

Caution:

Do not stand or sit on console.

A level and sturdy foundation is required before console construction can begin.

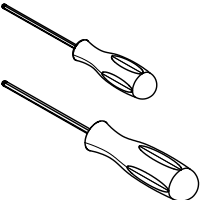

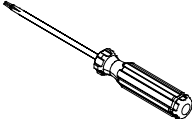

Incorrect installation could void your warranty. Have peace of mind by contacting a TBC certified technician. To locate one close to you, email support@tbconsoles.com.

Design Build:

Each Monitor Frame is made to order and built around specific monitor models and quantities as approved in the final design drawings. Any changes to the monitors, or to factors previously unknown in design, may necessitate different parts and a design consultation with your salesperson.

TBC makes no representation on the ability to change the configuration sold with the current parts provided. If there is a foreseeable future change in monitor size or position then please ensure this is communicated to your salesperson.

Needed for Installation:

	<p>3/16" Hex Screwdriver</p> <p>1/4" Hex Screwdriver</p>		
		Phillips Screwdriver	Helper

PARTS

Rev.1.03

Parts used in your Monitor Frame may vary, refer to provided engineering drawings for your project

A

Upright
(shown w/ 2 pre-installed hooks)

B

Horizontal Extrusion

C

Left Monitor Frame
Support Bracket - Qty (1)

D

Right Monitor Frame
Support Bracket - Qty (1)

E

Horizontal Wire Trough

F

Vertical Wire Trough

HARDWARE

AA

5/16-18 x 3/4" Button Head Screw

BB

5/16-18 x 5/8" Button Head Screw

CC

1/4-20 X 5/8" Button Head Screw

DD

1/4-20 X 1/2" Button Head Screw

EE

#12 x 3/4" Pan Head Screw

FF

Round Grommet Nut

GG

Anchor Fastener

Step 1

For installations* needing more than one anchor fastener per extrusion, remove set screw on the single T-Nut only to mount the upright with anchor fasteners.

***Typical of ControlTrac, intelliTrac, and FITT Consoles.
SmartTrac consoles with heavy or high monitor frames.**

Step 2

Insert (1) Anchor Fastener (GG) into the bored hole in the Right Upright (A) then secure the Upright to the T-Nut set in the Rear Trac. Repeat procedure for the Left Upright (A).

Step 3

For monitor frames with horizontal extrusion close to the rear extrusion of the console, loosen the set screw located on the J-Bracket in the upright and position using the provided spacer block. Tighten set screw and remove spacer. Repeat this step for all extrusion J-Brackets in this position.

Step 4

Slide Horizontal Extrusion (B) onto the pre-installed Hook Brackets on the Upright (A) then secure using (BB) Screws. Repeat this step for each additional Horizontal Extrusion.

Step 5

Attach the Left Monitor Frame Support Bracket (C) to the Upright (A) using the button head screws (AA) and to the Countertop Support Arm using button head screws (DD). Repeat Step for Right Monitor Frame Support Bracket (D).

Step 1

Align bracket on horizontal Extrusion (B) with the bracket on upright Extrusion (A).

Step 2

Using (2) [DD] screws attach Extrusion (B) bracket to Extrusion (A) bracket on the top and bottom. Fasten other side of Extrusion (B) to the other pivot or fixed bracket.

HORIZONTAL TROUGH

Insert the tabs of the Horizontal Wire Trough (E) into the top slot of the Horizontal Extrusion (B) and rotate downward to lock the Horizontal Wire Trough into place.

VERTICAL TROUGH

Attach the Vertical Wire Trough (F) to the Uprights (A) by inserting the round grommet nuts (EE) into the extrusion slot and driving the pan head screws (FF) into the grommet nut.

FP-9110 MONITOR ARM

Rev.1.03

Insert the stem of the FP-9110 Monitor Arm into the pre-attached mounting cup bracket and secure the Monitor Arm using a dog washer (HH) and flat head screw (II).

Dog Washer
(QTY 1)

10-32 x 3/8"
Flat Head Screw
(QTY 1)

AM50 MONITOR BRACKET

Attach the AM50 Monitor Bracket to the Horizontal Extrusion (B) using (4) button head screws (JJ) - Screw through the Monitor Bracket into the T-nuts set inside of the Horizontal Extrusion.

5/16-18 x 1/2"
Button Head Screw
(QTY 4)

AM 65/95/175/LMV MONITOR BRACKET

Rev.1.03

Locate scribe marks on front face of extrusion. Position T-nuts, which are pre-installed inside horizontal extrusion, approximately 6" inside each scribe location. Finger tighten (4) set screws into T-nut locations. Align the Monitor Bracket (AM175 shown) to scribe marks and attach using (4) 5/16-18 Hex nuts with (4) 5/16" washers by screwing into the pre-set T-nuts and tighten with 1/2" wrench.

PRIVACY SCREEN

Place the Spacer (LL) over the pre-installed threaded stud on the Upright (A) then hang the Privacy Screen on the threaded studs and attach with the Acorn Nuts (MM).

NOTES

TBC Consoles provides a robust warranty on all our products, however, incorrect installation could void this warranty. Save time by engaging with our expert installation team, contact support@tbconsoles.com.
