Overview

From a single operator workstation to complete control rooms, each console is accessorized to personal preference and designed to incorporate your equipment.

* Denotes optional item

Overview

Height Adjustability

SmartTrac Series has a number of standard and upgrade options for setting the perfect height or adjusting the height of your console. Our standard fixed height console has a countertop located 28 5/8" from the floor. Custom fixed height (including standing height) options are available. Maximum capacity of 500 lbs (226 kg).

- 0.1W standby power
- Integrated anti-collision technology
- Programmable as imperial or metric
- Able to set min or max height within range

Options

Controllers

PADDLE W/ REMINDERS

- Standard controller
- Built-in anti-collision sensor
- Memory positions and display

WORKSURFACE

- Upgrade option
- Easily integrated into tabletop
- Memory positions and display

EDGE MOUNT

- Option for multiple planes
- Non-Bluetooth compliance
- Memory positions and display

DESK CONTROL

- App for iOS or Android
- Pairs to multiple desks
- Sit to Stand reminders

Power and data management are some of the most critical aspects of any piece of technical furniture. We have a variety of ways to handle cabling within the console and peripherals connected to the SmartTrac Series. Leg channel cable routing is exclusive to fixed-height consoles. Visit our [website](#) for more information.

SmartTrac V3
Product Guide

The ultimate modular desk solution. Available in 2, 3, and 4 bays with half bay additions. Removable modules to insert rack turrets, with a full cable core to support equipment and power management. Optional sit/stand with Bluetooth® enabled controller.

- Sit/Stand or fixed height
- Multiple surface and edge finish options
- Swing out front door access and optional rear door
- Full length rear trac for articulating monitor or speaker arms and other accessories
- Large cable core enclosure with vertical divider for power/data cable management

Turret Depth Capacities

2RU

3RU

4RU

5RU

Full depth countertop with optional size cable cores to support equipment, power/data management, and the availability of a new flat-back-core for tight rooms. Optional sit/stand with Bluetooth enabled controller.

- Sit/Stand or fixed height
- Multiple surface and edge finish options
- Swing out front door access and optional rear door
- Upgrade to full-core or flat-back-core for power/data cable management
- Rear countertop brush strip allows cables to seamlessly drop into the core
- Full length rear trac for articulating monitor or speaker arms and other accessories
- Mini-core management allows for access to the front and rear without removable doors

Cable Core Options

Flat-back-core section

Full-core section

Mini-core Section

Overview

Bi-Level

Custom console with features such as dual plane surfaces and optional full or mini cable cores. The bi-level console has the option of adjusting two different surfaces for sit/stand functionality and optimal sight-lines.

- Sit/Stand or fixed height
- Multiple surface and edge finish options
- Swing out front door access and optional rear door
- Upgrade to full-core or flat-back core for power/data cable management
- Full length rear trac for articulating monitor or speaker arms and other accessories
- Mini-core management allows for access to the front and rear without removable doors

Fixed Height with Mini-Core

Height Adjustable section

Fixed Height section

Overview

Back to Back

Custom console with features that include a robust cable core for equipment and cabling. Available as "console" or "workstation" style with or without openings for upper modules such as turrets. For a back-to-back situation that requires height adjustability we would recommend a flat-back-core SmartTrac Console or Workstation as this version is only available in fixed height.

- Fixed height
- Built-in option for power/data in center
- Multiple surface and edge finish options
- Swing out front door access and optional rear door
- Full length rear trac for articulating monitor or speaker arms and other accessories
- Large cable core enclosure with vertical divider for power/data cable management

SmartTrac V3
Product Guide

The SmartTrac Desk Series features one or two cabinets that are used instead of legs. These cabinets may be adapted as spaces for CPUs, filing, and/or additional rack space. Plexiglas doors are available to hide equipment in the cabinet

- Fixed Height
- Multiple surface and edge finish options
- Swing out front door access and optional rear door
- Full length rear trac for articulating monitor or speaker arms and other accessories
- Large cable core enclosure with vertical divider for power/data cable management
- Mini-core management allows for access to the front and rear without removable doors

Companion Pieces

Our SmartTrac line is designed to work with a number of add-on companion pieces that can be customized to fit the requirement of the room. We refer to it as a “suite” when you add one companion piece on each side of the console. Seen here is our classic combination of a nested mobile cart and fixed-height producer table.

For more on preconfigured suite options, please view our sample configurations on page 12 of this guide.

SmartCarts

Our mobile equipment racks and side carts include an embedded device track, heavy duty casters, and options for front and rear rack rail when required. Options include lockable front doors, thermostatic fan controls, and sound isolation.

Carts and tables shown above are only representative models, more can be seen by [visiting our website](#).

For more information about carts and companion pieces with the SmartTrac, please [visit our website](#) or our Accessories and Carts product guide.

SmartTrac V3
Product Guide

Working with straight and angular (10°, 15°, 30°, 45°, and 90°) aluminum transitions, SmartTrac Consoles can be configured to create visually appealing and functional layouts for single or multiple operators. Reverse angle transitions are offered in 5°, 10°, & 15° versions, providing a range of options for optimizing workspace ergonomics.

The monitor frame is a system that mounts to the rear device track of our SmartTrac Series to allow rigidity with multi-monitor arrangements, while providing some cable management and panel options to hide the rear view of the monitors. The structure is designed to eliminate monitor shake while permitting larger display monitors to be available on smaller consoles. The design allows precise and repeatable placement of monitors, plus lateral adjustment or change in the future. Cable duct included to route wires neatly along framework into the core. The extrusion provides multiple mounting locations for accessories such power strips or peripheral audio/video monitors.

Accessories Modules

Upper modules are part of what make TBC's system modular. We have a variety of turrets, infills, and dropwells that can be added or removed without tools as your console and equipment needs change.

The turrets/modules shown below are stocked, additional models are available in a wider variety of sizes. Turrets made with silver or black powder coated aluminum and available with a variety of rack rail options. For more information, please visit our accessories page or speak to your Account Manager.
